PROFESSIONAL SUMMARY

Motivated B.Tech graduate in Artificial Intelligence and Data Science (CGPA: 8.2) with hands-on experience in machine learning, data analytics, and full-stack development. Proficient in Python, SQL, Tableau, Power BI, Java (Spring Boot), React.js, and Microservices. Demonstrated ability to build end-to-end data pipelines, interactive dashboards, and RESTful backend systems. Certified by Oracle in Generative AI, AI Vector Search, and APEX Cloud Development. Seeking an entry-level role in data science, analytics, or software development to contribute analytical and engineering expertise in a results-driven environment.

TECHNICAL SKILLS

Programming Languages: Python, Java, R, SQL, C++, C, JavaScript, HTML, CSS

Machine Learning & AI: Scikit-Learn, Pandas, NumPy, Supervised/Unsupervised Learning, Feature Engineering

Data Visualization: Tableau, Power BI, Advanced Excel

Backend Development: Spring Boot, Spring MVC, Microservices, Spring Data JPA, Hibernate, JDBC, Servlets, JSP, RESTful APIs, React.js

Database Management: MySQL, SQLite, Database Design, CRUD Operations, ORM

Cloud & Platforms: Microsoft Azure, Oracle APEX, Oracle Cloud Infrastructure

Tools & Testing: Postman, Git, GitHub

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Aug 2021 – Nov 2025

SIMATS Engineering College, Chennai | CGPA: 8.2 / 10.0

PROJECTS

Employee Management System | Personal Project

March 2026

- Built a full-stack backend Employee Management System using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL.
- Developed and consumed RESTful web services for employee management, reducing manual database operations through automated CRUD functionality.
- Leveraged Hibernate ORM and JPA Repository for database interactions, eliminating the need for complex SQL queries.
- Applied software engineering best practices including layered architecture, dependency injection, exception handling, and API testing with Postman.

Sales Analytics Dashboard | Personal Project

December 2024

- Built an end-to-end sales analytics pipeline using Python (Pandas), SQL (SQLite), and Tableau on 10K+ Superstore records.
- Designed fact and dimension tables; developed KPI metrics including Revenue, Profit, and Orders using SQL aggregations.
- Created a fully interactive Tableau dashboard featuring trends, category performance, geographic insights, and customer segmentation.
- Implemented dynamic filters and dashboard actions for drill-down analysis by year, segment, category, and region.

Tamil Nadu Crime Data Analysis | Academic Project

July 2024

- Conducted end-to-end crime trend analysis (2014–Present) using NCRB and Tamil Nadu Police datasets covering 10+ crime categories.
- Performed correlation analysis across crime types to uncover statistical patterns and trends in juvenile, caste-related, and murder crimes.
- Delivered data-driven recommendations for proactive policing, youth counseling programs, and improved rural crime reporting mechanisms.

Fraudulent Scam Call Detection using Machine Learning | Academic Project

November 2023

- Developed a binary classification model using Python, Pandas, and Scikit-Learn to predict fraudulent calls from historical call data.

- Applied data cleaning, feature engineering, and model tuning techniques, achieving a 10% accuracy improvement over baseline models.

PROFESSIONAL TRAINING

Java Full Stack Development | Greens Technologies, Chennai Jan 2026 – Jun 2026

- Completed Core Java (OOP, collections, multithreading, exception handling) and Advanced Java (JDBC, Servlets, JSP).
- Built web applications using Spring MVC, Hibernate, Spring Boot, and Microservices architecture; developed front-end interfaces with React.js, HTML, CSS, and JavaScript; integrated Core REST APIs for client-server communication.
- Practised database management using MySQL including joins, complex queries, and CRUD operations.

VIRTUAL EXPERIENCE PROGRAMS (FORAGE)

Data Analytics Job Simulation – Deloitte Australia August 2024

- Completed simulation involving data analysis and forensic technology; created a business insights dashboard using Tableau.
- Used Excel for data classification and deriving business conclusions from complex datasets.

Data Visualisation Job Simulation – Tata Consultancy Services August 2024

- Prepared executive-level questions and created compelling data visualizations to support senior leadership decision-making.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Oracle
- Oracle APEX Cloud Developer Certified Professional – Oracle
- Oracle AI Vector Search Certified Professional – Oracle
- Data Analytics – Cisco Networking Academy
- Java Certificate Course – Great Learning

SOFT SKILLS

Communication • Problem-Solving • Team Leadership • Adaptability • Time Management

LANGUAGES

English (Proficient) • Tamil (Native)
